

Raised Bill 6507

Comments of Levco Tech Inc.

LEVCO does not support Raised Bill 6507.

My name is Edward Levene, I am Vice President of Levco Tech Inc.

This Bill 6507 would eliminate the competitive choice for tens of thousands of Connecticut residential consumers and small businesses that are now receiving lower rates than the current Electric Distribution Standard Service prices.

Bill 6507 would be in effect a price increase for Connecticut residential and small consumers that are currently able to get lower electric rates than are offered by the Electric Distribution Companies.

Connecticut electric consumers benefit from having a competitive electric marketplace that allows them to obtain a variety of different types of price offerings from a group of different companies.

LEVCO strongly opposes Raised Bill 6507. We believe it will cost Connecticut jobs and cause tens of thousands of consumers to pay more money for electricity generation if enacted.
